How to Film Your Own Podcast or Interview Anywhere with 1 or 2 Phones

Quick-Start Guide: Under $20 or Completely Free!

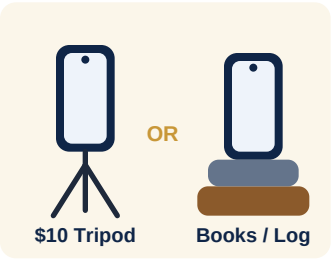
You do not need a fancy studio, expensive cameras, or a film crew to share your message. With the phone in your pocket and a few easy tricks, you can film a crisp podcast, interview, or testimony at home, in the woods, on a truck tailgate, or at church.

What You Need (Simple 3-Item Checklist)

1. 1 or 2 Phones

FREE (Already Own!)

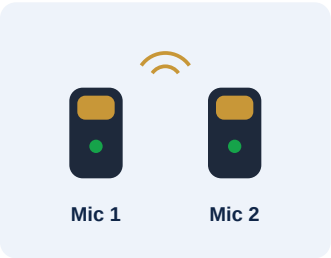
- Any iPhone or Android phone works great.
- Use 1 phone for a solo talk or Front + Back Camera Bubble mode.
- Use 2 phones for a pro 2-camera podcast or sit-down interview.



2. Phone Stands

$10 Mini Tripods OR FREE

- A couple of $10 mini tripods keep your phones steady anywhere.
- Out in the woods or at home with no tripod? Prop your phone on sticks, rocks, a truck tailgate, or a stack of books!
- Keep the camera lens at eye level so you look natural on screen.



3. Clip-On Wireless Mics (2-Pack)

OPTIONAL (~$20)

- Optional $20 clip-on Bluetooth or plug-in wireless 2-pack mics.
- Clip one tiny mic to each shirt collar so 2+ people sound like a pro studio.
- Cuts out wind and room echo when filming outdoors or in big rooms.

3 Fast Checks Before You Hit Record:

1. Wipe the Lens
Give your phone lens a quick wipe with your shirt so the picture is crystal clear.

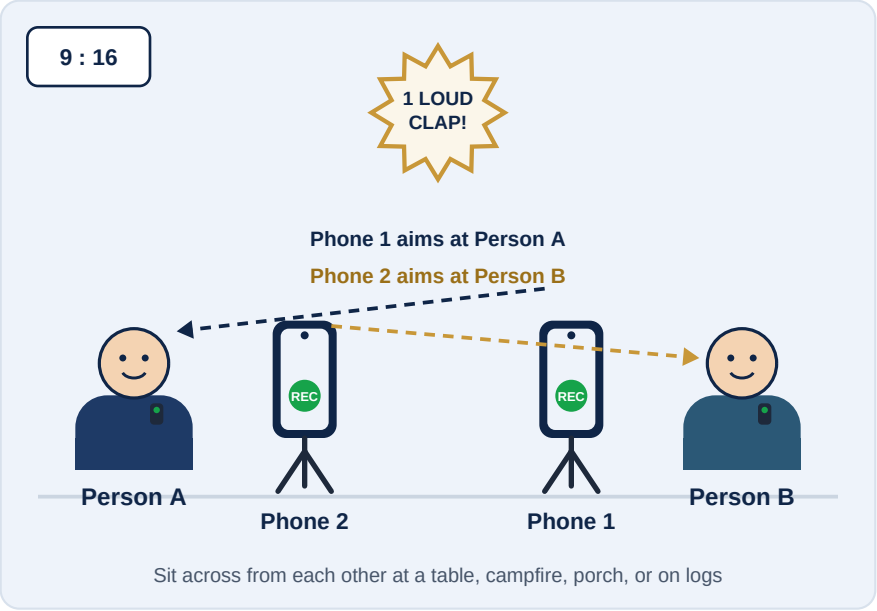
2. Face the Light
Put the sun or window in front of your face, not behind your back.

3. Do Not Disturb
Turn on Do Not Disturb so incoming calls never interrupt your story.

2-Phone Podcast Setup: Vertical (9:16) vs. Horizontal (16:9)

SETUP A: VERTICAL (9:16) - For Reels, Shorts & TikTok

STAND PHONES TALL



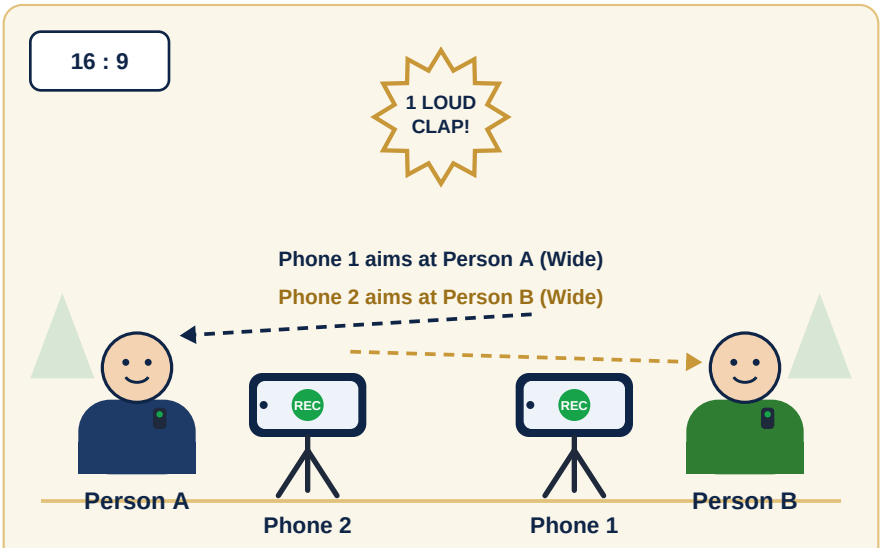
Sit across from each other at a table, campfire, porch, or on logs

How to Set It Up:

- **1.** Stand both phones upright (tall) on $10 mini tripods or propped on sticks, rocks, or books.
- **2.** Aim Phone 1 at Person A and Phone 2 at Person B across from each other.
- **3.** Both people tap the green Record button on their phone.
- **4.** Give ONE LOUD CLAP at the start! Our 24-hour auto-editor uses that clap to sync both cameras automatically.

SETUP B: HORIZONTAL (16:9) - For YouTube, TV & Alongside+

TURN PHONES SIDEWAYS



Same easy setup turned sideways for widescreen stories indoors or outdoors

Best Uses for Widescreen:

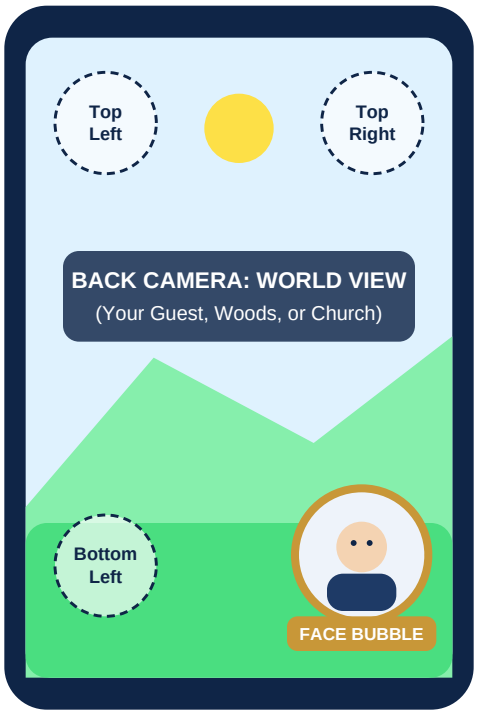
- **1.** Turn both phones sideways (landscape) for a full movie-style widescreen frame.
- **2.** Ideal for YouTube shows, TV, hunting and outdoors stories, testimony talks, or ministry podcasts.
- **3.** Tap the green Record button on both phones and give ONE LOUD CLAP before you begin.
- **4.** Just talk naturally! If you pause or laugh, keep going and our auto-editor will clean it up.

ONLY HAVE 1 PHONE? NO PROBLEM!

Place 1 phone sideways so both people fit together in the frame, OR use Front + Back Camera Bubble Mode on Page 3 to film yourself and your guest at the exact same time.

Front + Back Camera Bubble Mode & Audio Equalizer Check

FRONT + BACK CAMERA BUBBLE MODE (1 PHONE FILMS BOTH VIEWS!)



Film Yourself + What You See at Once

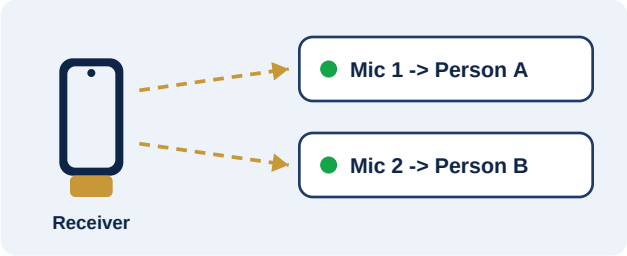
Turn on Camera Bubble Mode to show the world in front of you with your Back Camera while your face stays visible in a clean corner bubble using your Front Camera.

4 Corner Choices
Move your Face Bubble to Top-Left, Top-Right, Bottom-Left, or Bottom-Right with one tap.

Circle or Square Shape
Pick a friendly Circle bubble or a crisp Square picture-in-picture box.

1-Tap Swap Front / Back
Tap the Swap button anytime to flip your Face and World views right away!

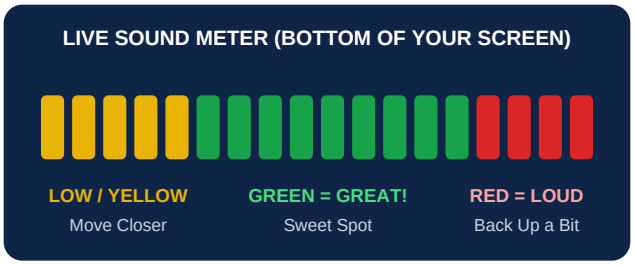
2-PERSON WIRELESS MIC PAIRING



- **1.** Plug the tiny receiver into your phone's charging port (or pair via Bluetooth).
- **2.** Turn on both clip-on mics and wait for the solid green light.
- **3.** Clip one mic onto each shirt collar, about 4 inches below your chin.

NO MICS YET? No problem! Just sit 2 to 3 feet from your phone in a quiet spot and speak clearly.

LIVE HORIZONTAL EQUALIZER BAR



- **Green (Audio Great):** Your voice sounds crisp and clear. Keep talking!
- **Yellow / Low:** Speak up a little or move closer to the mic.
- **Red:** Too loud! Back up a few inches from the mic.

GOOD NEWS: The live equalizer bar is only a helper for you. It NEVER shows up in your final video!

Hit Stop -> Add to Document Repository -> Free 24-Hour Edit

1

Tap the Red "Stop Recording" Button

When you finish your podcast or interview, tap the red Stop Recording button on each phone. Great job! You just filmed your episode.

STOP RECORDING

2

Tap "Add to Document Repository"

Right away, tap the green Add to Document Repository button. Your video uploads safely into your ministry folder. If you used 2 phones, tap it on both phones.

Add to Document Repository

3

Free Auto-Edit Ready Within 24 Hours!

Your video automatically enters Pre-Edit / Pre-Production. We sync your cameras using your clap, clean your sound, and have your polished video ready within 24 hours.

24-HOUR
FREE AUTO-EDIT

100% OWNERSHIP IN PERPETUITY GUARANTEE

Every video, podcast, interview, and file you create belongs 100% to YOU and your ministry forever. We never own your content, take royalties, or lock your files away.
